

Office of Research and Reports (ORR)

TALENT Control Officer:

The TALENT Control Officer will be designated by the Assistant Director, ORR, and will be responsible directly to him for the establishment and implementation of the TALENT control system within the Office. Furthermore he will

- a. insure maintenance of TALENT control standards,
- b. submit ORR requirements for research and analysis to the appropriate TALENT processing center,
- c. determine and certify the need for additional ORR personnel to be TALENT cleared, and
- d. perform such other duties with respect to the TALENT control system as the AD/ORR may from time to time assign to him.

TALENT Security Officer:

The TALENT Security Officer will be responsible to the TALENT Control Officer for insuring that

- a. the ORR TALENT Control Area complies with the requirements of the TALENT Control System Manual, 1956, with respect to all basic standards of the System,
- b. secure procedures ^{exist} for the transmission of TALENT materials outside the ORR TALENT Control Area to other ^{TALENT} components of CIA and/or other ^{TALENT} agencies, and
- c. adequate review is made of all ORR publications in the preparation of which TALENT materials have been used to assure proper sanitization.

The ORR TALENT Security Officer will meet periodically for the purpose of examining TALENT security problems with the CIA TALENT Security Officer.

TALENT Control Area:

The ORR TALENT Control Area will be established in the Special Center space in M building allocated to ORR. In order to minimize security problems, thought is being given to a joint OCL-ORR enclave within the Special Center.

~~SECRET~~Substantive Utilization of TALENT Materials:

Although definitive statements cannot now be made as to how the products of the TALENT system, will be used in ORR, it can be said that corroboration of opinion developed from less factual material will be one of the major benefits of the project. Other expected benefits include

- a. significant data on the time phasing, magnitude, deployment, and logistics of the air defense systems utilizing guided missiles,
- b. extent of activity and capacities of aircraft and naval construction complexes, and
- c. intelligence which will contribute directly to planning U.S. operations to defend against, or to attack and neutralize, economic strengths of the USSR.

Personnel:

The following ORR personnel will constitute the initial group of substantive analysts and administrative people to be cleared for TALENT materials:

<u>No.</u>	<u>Function and Position</u>	<u>Justification</u>
